What are the risks of investing?

Risk indicator for the Lifetime Lifesteps Stability Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund’s assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler/

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund’s future performance. The risk indicator is based on the returns data for the five years to 31 March 2024. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

How has the fund performed? ¹

	Average over past 5 years	Past Year
Annual return (after deductions for charges and tax)	2.29%	8.81%
Annual return (after deductions for charges but before tax)	2.38%	9.90%
Market index annual return (reflects no deduction for charges and tax)	4.18%	10.31%

The market index annual return for the Fund is a composite index, calculated using the return of each asset class index the Fund invests in, weighted by the Fund's benchmark asset allocation. On 2 October 2023, the composite index was updated due to the changes to the underlying funds in which the Fund invests.

See the Statement of Investment Policy and Objectives (**SIPO**) for details of the Fund's benchmark asset allocation and the asset class indices.

Additional information about the market index is available in the 'Statement of Investment Policy and Objectives' on the 'Scheme Register' at disclose-register.companiesoffice.govt.nz (search for 'Personal Superannuation Scheme').

This shows the fund return after fund charges and tax for each of the last 10 years ending 31 March. The last bar shows the average annual return for each of the 10 years, up to 31 March 2024.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.
